Service on the GO

OUR STRENGTH

Southsea Trading & Contracting (STAC) consists of excellent professionals with experience in technical and specialised qualification in their respective sphere of responsibility, gained through working with reputed organisations.

They met stringent selection and recruitment criteria and been put through the company's in-house and on-job training, and continuous training from our principals, all team members are capable of bringing good reputation for the company beside their own professional competence.

The corporate philosophy of delegated management ensures that team members quickly take on responsibility and are able to recognize and respond promptly to client's requirements. The company encourages continuing professional education its team through a regular program of in-house and external training. The objective is to remain up to date with developments and innovations in the telecom industry .

Service on the GO

Introduction

STAC was established in 2012 with an objective to provide product and services in the area of networking. The company place greater emphasis in understanding the customer need, budget and resources. This enables us to design a cost effective approach towards developing a solution. We build solutions to help business to manage networks of any size.

STAC, seizing the power of disruptive technology to convert the physical into digital intelligence changing your outlook and your outcomes.

We strongly believe that real business success is not just about profits measured in numbers but also, as importantly, about how those numbers are achieved.

STAC have a strong management team with many years experience in Qatar's service sector. This helped the company to grow faster in such a short span of time. The team is committed to quality, safety and time.

Range of Services

Network infrastructure solution provided by STAC consists of market leader product and services offering for all size of organizations. Thus providing clients improved communications and insight resulting in significant operational cost saving. IT infrastructure solutions cover the full extent of enterprise network convergence, including:

- ÿ Structured Voice & Data Cabling
- ÿ Networking Devices Integration
- ÿ Routing & Switching
- ÿ Wireless Network
- ÿ Security Surveillance
- ÿ Stateful Firewall Solution
- ÿ Satellite TV Installation and Configuration

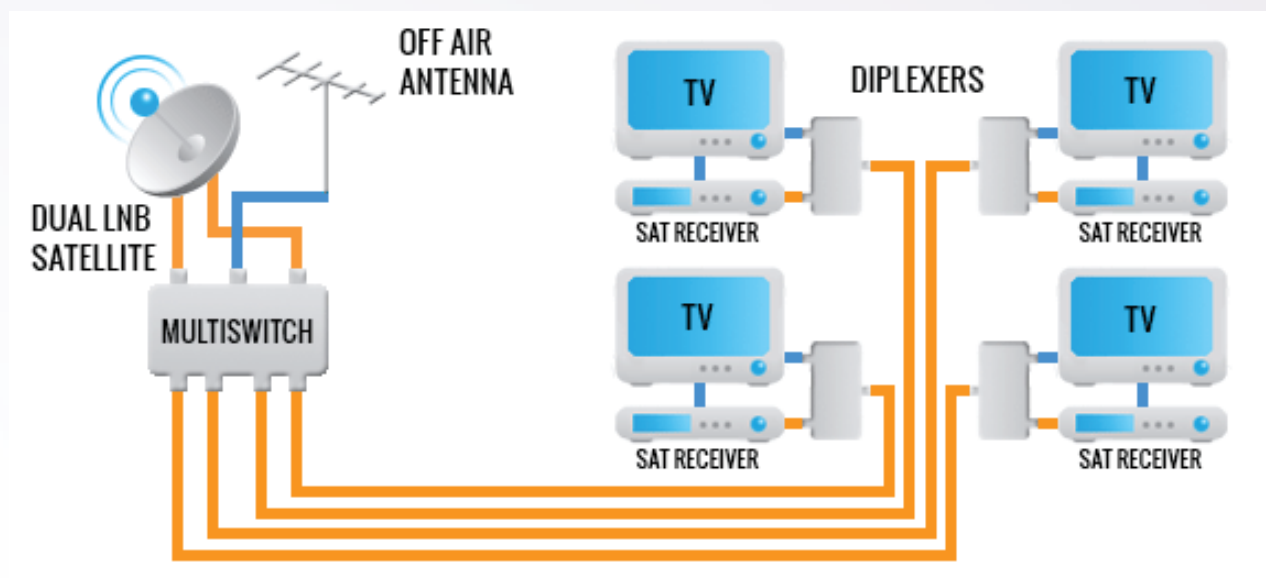

The scale of the solutions engulfs all the pieces of the networks ranging from data link devices providing complete solution, security solution and outdoor wireless bridges.

TV Satellite System

The Satellite television is television programming delivered by the means of communications satellite and received by an outdoor antenna, usually a parabolic mirror generally referred to as a satellite dish, and as far as household usage is concerned, a satellite receiver either in the form of an external set-top box or a satellite tuner module built into a TV set. Satellite TV tuners are also available as a card or a USB stick to be attached to a personal computer.

Direct-broadcast satellite television comes to the general public in two distinct flavors - analog and digital. This necessitates either having an analog satellite receiver or a digital satellite receiver. Analog satellite television is being replaced by digital satellite television and the latter is becoming available in a better quality known as high-definition television.

Building Blocks

People:

- ÿ Friendly & Welcoming
- ÿ Research Oriented
- ÿ Savvy & Pragmatic
- ÿ Proactive in Approach
- ÿ Technically Versatile

Process (procedures):

- ÿ Project Objective & Scope
- ÿ Technical & Financial Approvals
- ÿ Agreed Milestones
- ÿ Documented Each Phase
- ÿ Transferred to the Client

Technology:

- ÿ Integrated Hardware & Software
- ÿ Designed to meet your Management Requirements
- ÿ Customized to Manage your Specific Environment
- ÿ Cost Effective

Services Portfolio:

STAC provides on-site or remote services to meet the specific needs of its unique customers. It can place specially trained engineer at the customer's site or remotely manage the customers network from a NSS built enterprise management control center. STAC services include:

- ÿ Design
- ÿ Integration
- ÿ Transfer of Knowledge (Training)

People:

The design of the system is the first and most crucial step toward effective enterprise network management. NSS engineers apply a well-defined methodology to come up with a comprehensive solution keeping in mind the following design engagements:

- ÿ Organization Requirements
- ÿ Data & Voice Networks
- ÿ Network & Physical Security
- ÿ Remote Sites
- ÿ Network Management

Integration (implementation):

The next step is making the design alive to integrate and customize the individual components of the solution to transform the theory into reality. Our integration services include:

- ÿ Structured Cabling
- ÿ Wired & Wireless LAN
- ÿ Surveillance System
- ÿ Network Configuration
- ÿ Edge Security (Firewall)
- ÿ Voice/Telephony Integration

Transfer of Knowledge (Support Portfolio):

Dedicated help desk and call logging system
Dedicated customer support representative with dedicated phones
In-house backup inventory dedicated or pool basis
Project or time based SLA including 8x5x4, 8x5xNBD and 24x7 supports
Resident engineer or network management services for remote locations

OPTIMAL PERFORMANCE

Tracking, analysing, mobilising—everything depends on your wireless LAN. With STAC Solutions, performance is optimal, security tighter and rollouts and troubleshooting faster.

SMART MOBILITY

As mobility skyrockets, you will be ready to rapidly deploy devices, smoothly stream voice and video applications and connect roaming clients to the strongest, cleanest signal.

IMPACTFUL ENGAGEMENT

Provide the right offer, assistance & information at the moment of decision. It is possible with our location-based technology, the new way to engage with consumers and influence their behavior.
